

**3 pcs K 135 delivered in Poland
Bredal has, through our polish dealer
RB Uslugi, this spring delivered 3pcs
K135 to Poldanor in Poland.**

Poldanor is a company, who has a very good relation to Bredal, the main brand of fertilizer and limespreaders are Bredal, and it has been so for many years. Now the company has bought 3 pcs of the largest model of Bredal spreaders. The 3 new boogie spreaders holds 17m³ in the hopper.

The 3 new spreaders are substituting 9 older versions (3* B2, 3* B6 and 3* K85), then the "fleet" of Bredals is reduced from 11 pcs, to 5 pcs, so now it consist of 2 * K105 and 3 * K135.

The hopper volume in total in the 3 new spreaders are approximately the same as in the 9 old ones, but now Poldanor can reduce the number of tractordrivers with 6.

The 5 spreaders are, according to Bjarne Møller of Poldanor, to maintain approximately 13.000 hectares, where they yearly spread app. 5000 ton of lime and 7500 ton of fertilizer. The 5 spreaders are mounted with the Bredal 500 computer which is GPS ready, and in the near future it is the plan to start GPS spreading of both lime and fertilizer.

The 3 pcs K135 is being pulled by 300 horse power tractors, and the 2 pcs K 105 by 200 horse power tractors. It is an impressive sight to see the 3 large spreaders in the fields in Poland.
