

Agritechnica 2007

The big exhibition in Hannover, Germany, was as always an exiting week for Bredal, it is a big show for Bredal, where we get a good dialogue with existing and potential customers from all around the globe. As well as some good contacts and discussions with colleagues of other manufactors in the agricultural business. And as well it is always nice to see our dealers from all over the world, coming here with potential customers.

This year we have expanded our exhibition stand with approximately 100 m2, to get some more room at the stand to show the machinery and to have more sufficient room for our customers.

Because of the larger stand, we also had some more personnel at the exhibithion this year, we had a great help of Mr. Tomas Balciunas, who is Lithuanian, Russian and English speaking, by having him at our stand we could provide a better service for many of our new eastern european customers.

Beside Tomas Balciunas, and the staff from Bredal, we were also accompanied by our German dealer Honermeier (3 persons) and our Austrian dealer Ratasich (1 person), so in total we had a minimum personnel at the stand of 7 persons.

The show was very well attended, and we was very happy to see our many contacts from around the world, and are very much looking forward to see you all in Herning, Denmark in November 2008 to the Agromek show, which will be the next larger exhibition for Bredal.
