

New Markets

Bredal has in 2007 started up business in Both Bulgaria and Ukraine.

In Bulgaria, Bredal has started up business with the local company Agritrack inc., who also is the local importer of Valtra, Pöttinger, Hardi and others.

We are very happy to have started up business with a partner that seems to be very professional and reliable. The Bulgarian market is a market of great interest for Bredal, especially after entering the EU. We hope together with Agritrack to be a strong partner for the farmers in Bulgaria

As well as in Bulgaria we have found a serious business partner in the Ukrainian market, the company AMAKO is going to take care of the sale of the Bredal brand in Ukraine as our official importer, they will as well be our official importer for the areas of Kazakhstan and Turkmenistan.

We hope that AMAKO will expand the market for Bredal in their areas, and will provide the final customers with the good, reliable and professional service level, known from the other Bredal importers.
